

Introduction to python

Jadavpur University Code Club

The hello world program

```
print("hello world")
```

The hello world program

```
print("hello world")
```

Running the code

Two ways to do it:

- Interactive mode
- Shell mode

Variables

```
x = 1.0  
y = "hello world"
```

Indentation is important

```
if foo:
    if abc(x):
        print(x)
else:
    print(y)
```
